25X1	272 carloads of those mentioned have also been reported under shipment-record number series valid in 1953 which indicates, that this amount of supply may have arrived in the preceding months.
25X1	This figure contains items of supply not mentioned in the above tabulation.

The volume or ration supply has reached an all-time high. The about 1,500 carloads would be adequate for 28 days' requirements for all troops in the GDR. It cannot be determined whether the increase in the ammunition supply was caused by an increased consumption during the firing practices or whether it was connected with stock-piling purposes. The supply of tank spare parts which was also very high cannot yet be interpreted. Repair work at the workshops has not been intensified, nor did the number of tanks turned in for complete overhaul increase. The 169 carloads of motor vehicles were consigned almost exclusively to Strausberg-Stadt. The shipments probably consisted of truck chassis for the equipment and motor vehicle depot of the Twenty-Fourth Air Army. See Trans Letter No 110, paragraphs c and f.
